

CERAMIC COLLECTION **ZSOLT JOZSEF SIMON**

FBC London is the exclusive stockist for the creation of the Flying Gardens series. Based on an advanced development from a slip casting technique, the liquid clay is poured into a plaster mold where the slips allowed the water to drain out, leaving the solid clay inside. The excess slip is usually removed from the mold. However, the artist intentionally lets it escape provoking an interesting effect and creating a new forming method. Through this sculptural ceramic, the artist not only aims to show the lightness and the poetic aspect of the material, but also push the boundaries of the process.

FLYING GARDEN I

FLYING GARDEN I- PEACH

DIMENSIONS
H: 360mm x D: 340mm

MATERIAL
Porcelain

DIMENSIONS
